SUMMARY

Full Stack Developer with **2+ years of experience** building scalable and responsive web applications using **React.js, TypeScript, JavaScript, Redux Toolkit, Node.js, Express.js, and REST APIs**.

Strong experience in **reusable component architecture, state management, form validation, CRUD operations, API integration**, responsive design, debugging, testing, and **performance optimization**.

Hands-on experience developing backend services using **Node.js, Express.js, Python, and FastAPI** with **MySQL, MongoDB, and PostgreSQL**.

Experienced in delivering **end-to-end features**, collaborating with development teams, troubleshooting production issues, and implementing scalable frontend and backend solutions.

ROLES & RESPONSIBILITIES

Develop scalable frontend applications using **React.js, TypeScript, JavaScript, and Redux Toolkit** with reusable and maintainable component architecture.

Design and integrate **RESTful APIs** using **Node.js, Express.js, Python, and FastAPI**.

Implement **CRUD operations, role-based access control, authentication, form validation, and state management**.

Develop **responsive and optimized UI** applications for desktop, tablet, and mobile devices.

Perform **frontend performance optimization** using **code splitting, lazy loading, memoization, and render optimization**.

Debug and resolve **UI, API, validation, and production issues** while improving application reliability and user experience.

Collaborate with development and product teams to analyze requirements, develop features, perform testing, and deliver **production-ready applications**.

TECHNICAL SKILLS

Frontend: **React.js, TypeScript, JavaScript ES6+, Redux Toolkit, Next.js, React Router, Context API, Hooks, HTML5, CSS3, Bootstrap, MUI, Tailwind CSS**

Backend: **Node.js, Express.js, REST APIs, Python, FastAPI, NestJS**

Database: **MySQL, MongoDB, PostgreSQL, SQLite**

Performance: **Code Splitting, Lazy Loading, Memoization, Render Optimization, Lighthouse Optimization**

DevOps & Tools: **Git, GitHub, Docker, Linux, CI/CD, GitHub Actions, Yarn, SMTP**

Development: **CRUD, API Integration, State Management, RBAC, Authentication, Form Validation, Responsive Design, Debugging, Testing, Performance Optimization**

PROJECTS

Personalized AI Chatbot | *React.js, TypeScript, Python, FastAPI* Independent Project

- Designed and built an end-to-end **AI chatbot** using **React.js, TypeScript, Python, FastAPI, and REST APIs**.
- Implemented **LLM and RAG pipelines** using **embeddings, retrieval, and context-aware response generation**.
- Developed a responsive chat interface using **reusable React components**, state management, API integration, error handling, and performance optimization.
- Implemented streaming responses and optimized frontend interactions to improve perceived response performance.

Human Resource Management System | *React.js, TypeScript, Node.js, MySQL* Production Application

- Developed an enterprise **HRMS application** covering **Employee, Leave, and Performance Management** modules.
- Implemented **CRUD operations, role-based access control, Redux state management, form validation, and REST API integration.**
- Built reusable and responsive UI components and integrated frontend applications with **Node.js and Express.js** backend services.

Cannyfore & MSX International Websites | *WordPress, HTML, CSS*

Web Development

- Maintained and enhanced **WordPress websites**, implementing content updates, UI improvements, new features, and functionality changes.
- Improved **responsive layouts** across desktop, tablet, and mobile devices and resolved cross-browser styling and functional issues.

EXPERIENCE

Cannyfore

Coimbatore, Tamil Nadu

React.js / Full Stack Developer

2024 – Present

- Developed a **Human Resource Management System** from scratch using **React.js, TypeScript, Redux, Node.js, Express.js, MySQL, and REST APIs** within a **3-member development team.**
- Developed **Employee, Leave, and Performance modules** using reusable React components, **CRUD operations, role-based access control**, API integration, and Redux state management.
- Built **responsive and optimized UIs** for desktop, tablet, and mobile devices while handling frontend-backend integration, SMTP integration, debugging, testing, and end-to-end workflows.
- Performed **frontend performance optimization**, debugging, testing, and production issue resolution to improve application stability and user experience.

Lenovo Target Tool

Associate Developer

July 2024 – November 2024

- Developed responsive interfaces using **React.js, Redux, HTML, CSS, and Bootstrap**, implementing reusable components and custom validations.
- Enhanced the existing **React.js codebase**, optimized frontend workflows, and resolved UI, validation, and functional issues.
- Collaborated with development and product teams to implement requirements, integrate backend data, and deliver features using **Git and Yarn.**

Cannyfore & MSX International Websites

Frontend Developer – WordPress

- Maintained and updated **WordPress websites**, implementing content changes, UI improvements, new features, and website enhancements.
- Improved **responsive layouts** across desktop, tablet, and mobile devices and resolved styling and functional issues.

EDUCATION

Manipal University

India

Master of Computer Applications (MCA)

Park's College

Palladam, Tiruppur

Bachelor of Commerce

2021

INTERNSHIP

AS Global Soft Tech

MERN Stack Intern

- Worked with the **MERN stack** and gained hands-on experience in frontend and backend web application development.
- Worked with **React.js, Node.js, Express.js, MongoDB, and REST APIs** to develop reusable application components.
